

SGC Engineering
Civil Project Engineer

We are seeking a Civil Engineer for our expanding utility consulting services business. This highly motivated and qualified individual will perform design work on high voltage electrical projects including transmission line, substation and renewable energy projects. The list of possible duties includes those noted below as well as other opportunities that may arise. Typical clients are Electric Utilities and other Independent Power Generators. The position is available in any of our four Maine offices.

Requirements:

Must have a BS in Civil Engineering. Two to 5 years' experience in an engineering consulting firm or other related work environment is required. Demonstrated ability to apply knowledge of principles and practices to broad areas of assignment. Ability to handle multiple projects simultaneously. Experience with electric utility or renewable energy projects is a plus. Excellent written and oral communications skills. Proficiency in AutoCAD and the Microsoft Office suite of software is required.

Job duties include:

- Performs design services related to site layout, grading, drainage, utilities, and erosion control in conformance with local, state and federal regulations
- Prepares construction plans using AutoCAD/Civil 3D
- Prepares specifications and cost estimates
- Plans and coordinates projects with limited supervision
- Participates in preparing proposals and project scope, schedule, and budget
- Provides construction support services

We offer a comprehensive benefit package that includes:

- Competitive salary
- Vacation, Holidays, Sick and Personal Time
- 401(k) Plan with Employer Match – Immediate Vesting in both
- Health, Dental, and Vision Insurance
- Life Insurance / Long-Term Disability
- Tuition Assistance
- Free Parking
